

Aircraft component OEMs, MRO facilities and operators depend on Testek Solutions for highly reliable aerospace test equipment to certify hydraulics, power generation, avionics, fuel, lube, actuator, and pneumatic components. With a 50-year track record of success, Testek uniquely holds long-term OEM partnerships, provides the industry's leading equipment warranty, and support from a dedicated worldwide team.

We are actively seeking an experienced **Project Manager** to work with a worldwide dedicated team to focus on the execution and delivery of Test Stands and related equipment to our valued customers by working with our engineering, manufacturing, and aftermarket teams to meet project schedule and budget, while working directly with our customers.

### **Job Responsibilities**

- Identify all program deliverables to include equipment, data, and services
- Perform planning appropriate to the program scale and complexity
- Develop budget and schedule contingencies, manage critical path effort, and practice cost/schedule compression
- Pursue increased program profits through costing reductions and/or adjusted program scope with corresponding pricing adjustments
- Identify risks impacting cost, schedule, and performance
- Assess the potential impact, work with appropriate internal and external resources to identify and implement appropriate mitigation strategies, and monitor performance
- Monitor program costs, schedules, and deliverables
- Perform root cause analysis using appropriate tools to flesh out clear problem statements, root causes, and effective sustainable solutions
- Provide daily summary of key successes, failures, and corrective action plans
- Prepare materials for project initiation discussions, program and technical design reviews, and department and company meetings.
- Provide material summary and detail appropriate for the audience and with depth as needed for subject matter experts
- Develop an understanding of the suppliers, customers, products, and projects necessary to engage all key stakeholders as required for program success
- Capture lessons learned, engage in kaizen and similar continuous improvement activities
- Review and champion past lessons learned on programs
- Articulate program visions, leverage internal and external resources to achieve project goals, and engage all stakeholders in planning

### **Requirements**

- Minimum of a Bachelor degree in engineering or science required, Master's Degree preferred
- Minimum of 8 years of experience required
- MS Project and ERP experience required
- PMP or Certified Associate in Project Management preferred
- AutoCAD and Salesforce experience preferred
- US Citizen /Green Card preferred

Testek Solutions requires all new hires submit and pass a pre-employment drug screen, credit check (when applicable), and background check prior to beginning employment.
